## AGRICULTURE

Agriculture is the process of producing feed, fibre, food and other needed products by the cultivation of certain types of plants and the raising of livestock. Agriculture is also known as farming. Agriculture has many positive outcomes, but also has a huge impact on the environment such as the destruction of wildlife habitats from clearing forests for cropland.

*Write 2 negative impacts agriculture has on the environment:*

1)

---

---

2)

---

---

Many positive outcomes come from agricultural practices such as more food for the world's growing population, support for the development of more towns and cities etc.

*Write down 2 more positive outcomes agriculture provides:*

1)

---

---

2)

---

---

*Draw a picture of agriculture effecting the environment e.g. deforestation for croplands or livestock.*
