

Teacher Note

True / False answers

An earthworm has no arms, legs or eyes	True
Earthworms live in buildings	False
Earthworms are cold-blooded animals	True
Earthworms are mammals	False

Suggested Activities:

1. Dig up some earthworms and take some measurements as to their length, thickness and amount of worms found in one small area.
2. Make a compost area and note how worms increase in numbers after several weeks and months.

Outcomes:

Science – learn about worms

English – writing, reading, spelling, grammar
