

## *Answer Key – THE NERVOUS SYSTEM*

### **Underline the 13 mistakes.**

When Harry went to medikal school he had no idea how much he would learn about the nervaus system. In the begining he did'nt have a clue what the sacrle plexus was or the scietic nerve. He learned a lot about the cerebelum and the spinal cord. He received high comendations when he graduated and he is still studying to become a world-clas specialist in his medical field. His parents are very proud of him and recomend all their friends to see their son if they need his kind of services. Harry enjoys his proffession immenesely and treats all his patients with kindnes and sincere understanding.

### **Outcomes:**

Science – the human body, the nervous system

English – word recognition, reading, spelling
