

Goanna

(go-ann-uh)

Read the story.

Goannas are Australia's biggest lizards.

The Perentie is a goanna and can grow up to 1.6 metres.

They are found in Central and Northern Australian desert areas.

They eat insects, reptiles, birds and small mammals.

Underline the words that should begin with a capital letter.

goannas are australia's biggest lizards.

the perentie is a goanna and can grow up to 1.6 metres.

they are found in central and northern australian desert areas.

they eat insects, reptiles, birds and small mammals.

*Make a goanna to full-scale (1.6 metres or 7 feet)
using recycled materials only.*
