

Honey Possum

Read the story.

Honey possums live in the forests of south-western Australia.

They are good climbers.

They feed on nectar and pollen using their long tongue.

They come out at night, using their smell and large eyes to find food.

Underline the words that should begin with a capital letter.

honey possums live in the forests of south-western australia.

they are good climbers.

they feed on nectar and pollen using their long tongue.

they come out at night, using their smell and large eyes to find food.

*Find a map of Australia and show your teacher
where the honey possum can be found.*
