

Name _____

Nauru

Nauru is a coral island of only 21.2 square kilometres (8.2 square miles) in the south-western Pacific Ocean. This gorgeous island contains one of the world's richest deposits of phosphate, a mineral used in making fertilizers. The people of Nauru welcome tourism and encourage visitors to learn more about their culture and history.

Draw the flag of Nauru in the box.

Convert 21.2 square kilometres into square metres. _____

Give 3 examples of how fertilizers can be used.

What types of food could you grow on a coral island such as Nauru?

Visit some of these web sites and learn more about Nauru.
